

# 75W Halogen, 100W Halogen, 70W HID & 150W HID Standard & Optional Features

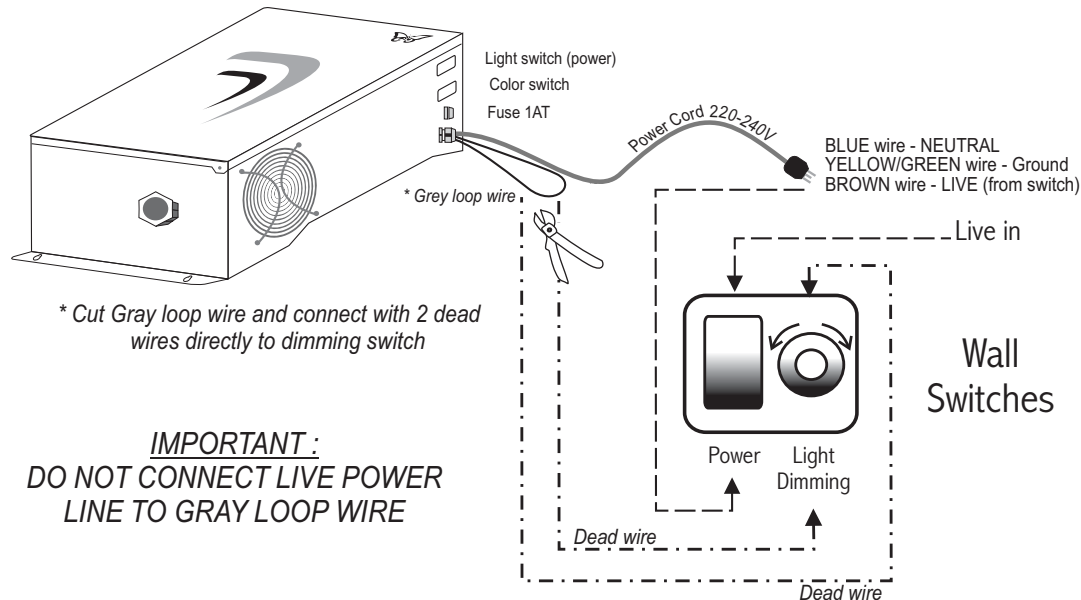

## A) WALL Switch Color Changing control (standard)

## B) REMOTE Color Changing control (optional)

## C) Fiber Light DIMMING control (non standard - on request only)

## D) Stand Alone Color SYNCHRONIZING (optional)

For color synchronizing operation, luminaires (light sources) are loaded with Synch. Module and they must be power up by a **single** switching control.

When powered up all color disc will mobilize to "Home Position" and hold to allow synchronizing.

After 80 seconds the color discs will begin its normal operation.  
*Single switching to power all luminaires required.*

No inter-connecting leads required between luminaires.
